Front-end Developer (React/NativeScript)

Description

Azon5 is seeking a full stack developer for a 3 to 6 month contract to build out new features and UI for an existing client/server application, REACT/Typescript front-end.

Contractor will work with a team of one UX designer and two front-end developers to implement a new UI and added software features. Job will start with a code review, after which contractor is expected to develop a 6-month roadmap and workplan.

Would be a plus:

knowledge of Python backend using Tornado

SQLite for data management

Knowledge of Angular 4 for legacy front-end code is preferred

Hiring organization

AZON5
